

NRSS and RSC Digital Skills Passport: Playbook for how to use and FAQs

London Transformation & Learning Collaborative (LTLC)

May 2021

NHS England and NHS Improvement

Contents

Note: this Playbook includes an overview, 12-step approach for users and FAQs

Overview

What is their purpose?

The passports summarise the role and essential skills required for a non-registered support staff (NRSS) and registered support clinician (RSC) to function in an intensive care unit (ICU) surge model of care, during the COVID-19 pandemic or other increase in demand for critical care capacity

Who are they for?

NHS staff undertaking NRSS and RSC roles in ICU during the COVID-19 pandemic, and managerial staff overseeing these roles

Who developed them?

The London Transformation and Learning Collaborative ([LTLC](#)), who formed in July 2020 to support London with the cross-skilling of the London NHS workforce for critical care, through education and training

How do I use them?

- [Click here](#) to access the digital skills passports – they can be accessed on your computer, smartphone or tablet
- This playbook has been designed to walk users through how to use the digital passports

Video: Intro to skills passport (23 secs)

“I found the RSC digital passport very easy – I did it on my phone, so it was really portable. The learning resources provided on the passport were complimentary and I could look at it whilst waiting for mask fit testing etc.”
Nurse re-deployed as RSC

Step 1: Register for a new account

- Follow the hyperlink to access the digital passports (<https://criticalcare.yourskillspass.com/>)
- Click “Sign-up” to register your account, and complete your key details

[Login / Register](#) [Help Guide](#)

London Transformation and Learning Collaborative (LTLC) Critical Care programme

Broadening the skill base of our NHS workforce to support critical care patients

The Critical Care Skills Passports summarise the roles and the essential skills required for a Registered Support Clinician (RSC) and Non Registered Support Staff (NRSS) to function in a surge model of care in an intensive care unit (ICU).

Register

Step 2: Login to access the 'Home' page

a. Once you have logged into your new account, you will be automatically taken to the 'Home' page

b. The ribbon at the top of the page allows you to easily navigate the different page (*note: these pages will be explained in the later steps*)

c. Using the pen icon (✎) you can upload a photo to your profile and edit your profile details

Step 3: Select your Skills passport

London Transformation and Learning Collaborative (LTLC) Critical Care programme
Broadening the skill base of our NHS workforce to support critical care patients

Welcome to your passport. Read the guidance below and select the appropriate passport for your role, experience and qualifications.
The emphasis on the learning in this passport is on self-assessment where you self-assess your ability to safely undertake a range of skills based on how confident you feel. As you are completing the passport ask a supervisor(s) to sign off on your proficiencies. You will not always be observed completing these proficiencies.

Non-Registered Support Staff

This passport summarises the role essential skills required for a non-registered support staff (NRSS) to function in a surge model of care in an intensive care unit (ICU) during the COVID-19 pandemic or other increase in demand for critical care capacity.

An NRSS may be:

- a Health Care Support Worker or
- a non-registered member of staff specifically recruited to ICU in this role or
- healthcare students who may wish to work on Critical Care Units during the surge as bank staff

Start Passport

Registered Support Clinician

This passport summarises the role essential skills required for a Registered Support Clinician (RSC) to function in a surge model of care in an intensive care unit (ICU) during the COVID-19 pandemic or other increase in demand for critical care capacity. In March 2020, the NMC and other national bodies recognised, in the Joint Statement on Developing Immediate Critical Care Nursing Capacity, during surges of Covid-19, there may be a requirement to temporarily depart from established procedures in order to care for patients and people using health services. Updated national guidance for workforce management during this time was published on 10 December 2020, Advice on Acute Sector Workforce Models During Covid-19.

An RSC may be:

- a junior ICU nurse who has not yet achieved their step 1 competencies in the National Competency Framework,
- a registered nurse, who works outside of ICU or
- a registered (non-nursing) health care professional.

Start Passport

- On the 'Home' page, you will be given the option to start two digital passports:
 - Non-registered support staff (NRSS)
 - Registered support clinician (RSC)
- Choose the passport that is most relevant to your professional role / ICU experience, by reading the descriptions provided
- Once you have chosen, click "Start passport" on your selected passport
- Once clicked, the button will automatically update to "started" and list the date "started on"
- Click "View Passport"

Status: Started
Started on: 26/01/2021
View Passport

Step 4: Understand the Passports Dashboard

a. Once you have chosen your passport and clicked “View passport”, you will move to the Passport Dashboard page

b. The essential skill domains for the passport selected are listed here (*note: do not click on yet*)

Registered Support Clinician

This passport summarises the role essential skills required for a Registered Support Clinician (RSC) to function in a surge model of care in an intensive care unit (ICU) during the COVID-19 pandemic. In March 2020, the NMC and other national bodies recognised, in the Joint Statement on Developing Immediate Critical Care Nursing Capacity, during surges of Covid-19, there may be a requirement to temporarily depart from established procedures in order to care for patients and people using health services. Updated national guidance for workforce management during this time was published on 10 December 2020, Advice on Acute Sector Workforce Models During Covid-19.

An RSC may be:

- a junior ICU nurse who has not yet achieved their step 1 competencies in the National Competency Framework,
- a registered nurse, who works outside of ICU or
- a registered (non-nursing) health care professional.

PPE - Able to describe the Public Health guidance for donning and doffing. *

☐ Yes
☐ No

PPE - Can describe the relevant action in the event of a Personal Protective Equipment (PEE) breach *

☐ Yes
☐ No

[Save & Next](#)

d. Click “Passport Dashboard” to return to the previous page

e. The “status” and “last Update” (date and time) will change once you have saved your self-assessment

Top tip

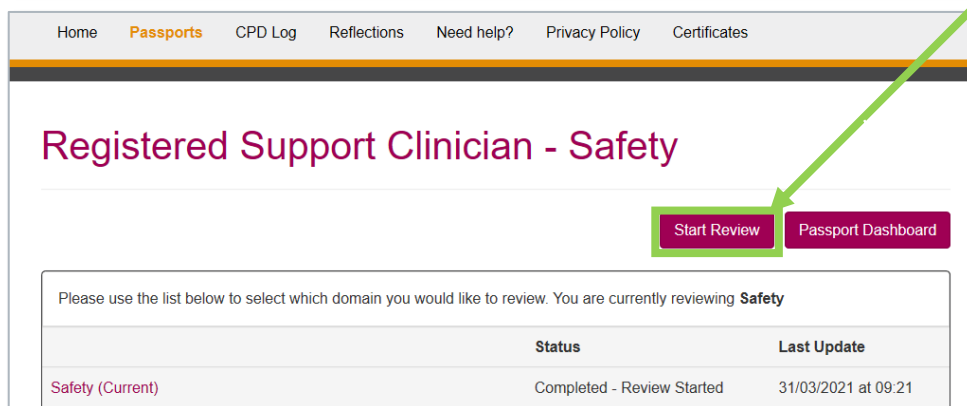

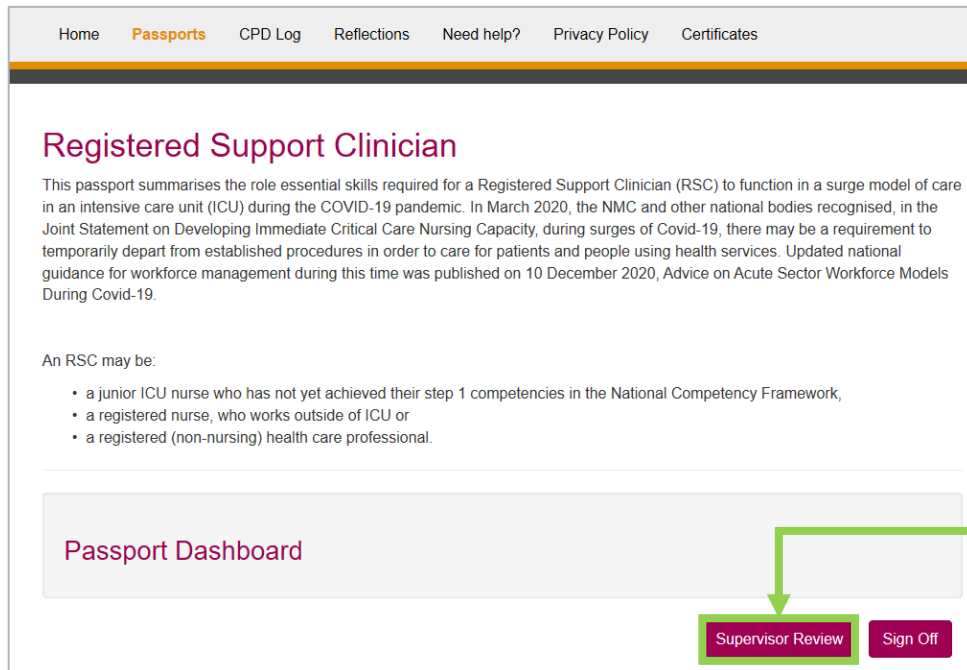

You can return and update your essential skills self-assessment as many times as you like, and don't have to complete them all at once. Just remember to click “save & next” at the bottom of the page to save your entries!

Step 6: Ask your supervisor to review (1/3)

- Once you have completed and saved your self-assessment (for at least one skill in a domain), you can ask your supervisor to review.

It is important all skills you have self-assessed as “yes” (i.e. competent) are reviewed by a supervisor, using the passport

- Click “Supervisor Review” (on Passports Dashboard) or “Start review” (on Domain page) and hand your device (e.g. mobile, laptop) to your supervisor

Top tips

- You should not review yourself, only a supervisor should
- Supervisors can review self-assessed skills at different times (i.e. they do not have to review all the skills within a domain at the same time). However, once they have saved their review they are unable to go back and edit it, so should double check!

Step 6: Ask your supervisor to review (2/3)

Home Passports CPD Log Reflections Need help? Privacy Policy Certificates

Supervisor to start review of Registered Support Clinician Passport

A Supervisor is a registered health care professional. This can be a Registered Nurse, Registered Allied Health Professional and/or Doctor.

Your Supervisor will be able to view the list of equipment that you are competent to use but does not sign off specific equipment in your passport.

Name *

Email Address *

NMC, GMC or HCPC Number *

Save

c. First your supervisor will be asked to enter their:

- Name
- Email address
- NMC, GMC or HCPC number

PPE - Able to describe the Public Health guidance for donning and doffing. *

Yes

☒ Has this been met?

PPE - Can describe the relevant action in the event of a Personal Protective Equipment (PEE) breach *

Yes

☒ Has this been met?

d. They will then be asked “Has this been met?” for each skill that you self-assessed as “yes” (i.e. competent). If you self-assessed a skill as “no” (i.e. not competent), your supervisor will not be asked to review

e. Once your supervisor has finished their review. They should click **Save Review & Next** (at the bottom of the page) and **End Review** (at the top of the page)

PPE - Able to describe the Public Health guidance for donning and doffing. *

Yes

Reviewed by Joe White (Joe.White@imperial.ac.uk) - XXXXXXXXXXXX on 18/03/2021

PPE - Can describe the relevant action in the event of a Personal Protective Equipment (PEE) breach *

Yes

Reviewed by Joe White (Joe.White@imperial.ac.uk) - XXXXXXXXXXXX on 18/03/2021

f. Once your supervisor has ‘saved’ and ‘ended’, their review will appear under the skill (only for those they said “Yes – this skill has been met”)

Step 6: Ask your supervisor to review (3/3)

Reflections

Reflecting on experiences in the workplace, which may be positive or challenging, and working with and supporting colleagues can have an impact on you as an individual. Reflecting on these experiences is vital to your personal wellbeing and development, and to improving the quality of patient care. Reflection is integral to lifelong learning and assists in meeting revalidation requirements.

[Further Guidance](#)

- i.e. What? ; So What? ; Now what?

Note: Click on “Further Guidance” for details of Rolfe’s model

Reflections

Please complete all the fields in the form below and then click submit to save them.

Date *
21/01/2021

WHAT? Describe your reflection identifying the facts and feelings of the situation.

I have been deployed to the Intensive Care Unit from the outpatients department where I usually work. The preparation and online learning which I undertook in relation to working in ICU on eLearning for Health has been invaluable and really did help to prepare. The staff on the unit have been welcoming and supportive, but I do not think anything could have really prepared me for working in full PPE for 12-hour shifts looking after critically ill patients. Using this passport to upskill has been useful. The incident which I want to reflect on relates to caring for a patient with Covid who is dying and liaising with the family to support them via a tablet device. Communicating like this and demonstrating empathy virtually is really challenging and not being in the same room.

SO WHAT? What did you learn from this?

I learnt that for the patients and family caring for patients at the end of their life and supporting the family in a pandemic is so important. Communication via and iPad is different, and it is important to make sure that you get the family member to repeat back to you that they have heard and understood. In their distress and with this type of communication it is vital to check understanding as the family member maybe I denial and not want to hear the bad news.

NOW WHAT? How has your practice changed or improved?

One of the experienced members of ITU staff suggested to me of getting family members to repeat back the information you had informed them of via iPad/virtual communication to check understanding. They also reinforced to me the importance of documenting the conversation in the patient's records including whom you spoke to, date and time of conversation and any actions arising from the conversation including follow up.

How is this relevant to your professional practice? You may find the following links to your professional bodies guidance on revalidation helpful.

[The learning from this reflection relates to the following sections of The Code. "Prioritise people and promote professionalism and trust". It has reinforced to me that effective communication skills are essential to end of life care. Supporting both patients and their families.](#)

[Save and finish](#)

d. As part of revalidation, it can be helpful to reference your reflections to your professional bodies’ requirements (i.e. NMC, GMC, or HCPC)

Click on “Help” icon (?) to find links to your professional bodies’ guidance on revalidation.

Step 11: Collect your certificate (1/4)

- a. Your passport will be counted as “Completed” once you have indicated you are competent in all of the skills listed in the passport (i.e. ticked “Yes”) and had a supervisor review and approve all of the skills.

Once you have completed a passport, you will be able to collect a certificate. To do this, click “Sign off”

- b. At the top of the ‘Sign Off’ Section you will be given the option to “Claim Certificate”

- *Note: If you do not see the “Claim Certificate” button, this is because your passport is not complete. Scroll down your heatmap to see what skill you have not indicated competency in, or you have not had reviewed by a supervisor*

PPE - Able to describe the Public Health guidance for donning and doffing. *	Yes	Reviewed by Ella Nuttall (Ella.nuttall@hee.nhs.uk) - XXXXXXXX on 31/03/2021

Step 11: Collect your certificate (2/4)

Declaration of Practice and Transferable Skills

I declare that I am clinically able to deliver care when deployed to areas which require the skills in the Critical Care Skills Passport.

I understand that I am considered capable in the skills for which I have achieved proficiencies as detailed in the digital Critical Care Skills Passport. If I move to another organisation these skills will be recognised by other participating organisations.

As an NMC, HCPC or GMC registrant, I understand that:

- I am responsible and accountable for my professional practice.
- I should bring to the attention of a more senior member of staff where I feel I do not have sufficient knowledge or skills to carry out any aspect of care.
- I must practice according to organisational practice guidance and policy.

Professional Development

If my role changes, I understand that I may need to expand my knowledge and skills to meet the requirements of the new role. To do so, I should return to this passport to review previously completed proficiencies from the Critical Care Skills Passport after discussion with my line manager or clinical practice educator.

Redeployment

It is my responsibility to identify areas where I feel I need to undertake supervised practice in the deployed area again to refresh these skills and revisit the relevant knowledge on [eLearning for Health care](#), where appropriate.

Please type 'I AGREE' in the box below.

- c. Before your certificate is generated, you will be asked to agree to the “Declaration of Practice and Transferable Skills” (by writing “I AGREE” in the box)
